

Speed Radar Gun

RHHS-Scout

Our RHHS Scout speed radar gun is available for either hire or sale. The RHHS is a model used widely in law and speed enforcement across the world. Fitted with a small LCD display, the user can point at a vehicle, pull the trigger and it will continuously track and measure the approaching vehicle speed in real time.

The RHHS Scout is a high end effective method of measuring and reducing vehicle speeds on both private sites and the UK highways alike. Housed within the base of the handle is a rechargeable battery back which can offer continuous operation for more than 6 hours with a recharge only taking 60 minutes. The RHHS radar gun is built in a toughened plastic casing and is built to withstand knocks and bangs on site. It is capable of measuring speeds between 7-199mph (7-199kph) for vehicles either approaching or moving away from the user. Targets can be safely measured at a distance of over 300ft away for maximum safety and the speeds will be shown in real time on the built in LCD Display. Users can be measuring speeds within 10 seconds of powering on the RHHS.

Radar Module –

- Make – Decatur SI-3 Antenna
- Sensor – K-Band
- Range – 7-199mph (7-199kph)
- Distance – 30-350ft
- Port for data collection to laptop

Power –

- 7.2v Rechargeable System
- Optional 12v in car charging
- Battery Life – 4-6 hours
- Fast recharging
- Low Voltage alert system.

Dimensions –

- Length – 250mm
- Width – 180mm
- Weight – (approx.) 1.5kg

Security –

- Optional Hard-Shell carry case

Why choose Roadside Technologies VMS:

- ✓ UK and EU authorised distributor for the RHHS
- ✓ 2 Year Warranty as standard
- ✓ Low failure rate with no moving parts
- ✓ Thousands of RHHS models in operation with law enforcement across the world
- ✓ Calibration packages available
- ✓ Long term lease options available
- ✓ Comes complete with 12 months calibration certificate
- ✓ Optional Hard-Shell carry case available
- ✓ Operational within seconds of switching it on
