

Speed Radar Gun

Sports Radar SR-3600 & LED Display

Our SR-3600 Speed Radar Gun is primarily designed for sports use and can measure speeds from objects the size of a golf ball up to a lorry. Due to the simplicity of use and setup, it has become very popular with users on private sites and community speed watch groups to measure and display the speeds to passing motorists to encourage them to slow down.

The SR-3600 & LED Display are available for either hire or sale. Designed for use within the Community Speed Watch Groups, it is designed to measure and display approaching vehicle speeds for driver feedback. Capable of measuring vehicle speeds of 10-250mph (10-250kph) from distances of up to 350ft away from the user for maximum safety. The LED Display can be powered using mains or a 12v leisure battery to offer longer run times where mains power isn't present. The SR-3600 can also be modified to measure lower speeds of down to 3mph making it an ideal choice for warehouse managers to monitor fork lift trucks.

Radar Module –

- Make – SR
- Sensor – X-Band
- Units – MPH, KPH
- Range – 10-250MPH (SR-3600LS 3-250MPH)
- Distance – 20-400FT
- Port for data collection to laptop

Power –

- 2x 9v PP3 Rechargeable batteries
- Optional 12v leisure battery
- Battery Life – 4-6 hours
- Fast recharging
- Low Voltage alert system.

Dimensions –

- Length – 250mm
- Width – 180mm
- Weight – (approx.) 6.5kg

Features

- Continuous Mode/Trigger Mode
- Data Acquisition Software
- Tripod Mounting Point

Why choose Roadside Technologies VMS:

- ✓ UK and EU authorised distributor for the SR-3600
- ✓ 1 Year Warranty as standard
- ✓ Low failure rate with no moving parts
- ✓ Calibration packages available
- ✓ Long term lease options available
- ✓ Comes complete with 12 months calibration certificate
- ✓ Optional Hard-Shell carry case available
- ✓ Operational within seconds of switching it on
