

## Vehicle Activated Sign SDT-VAS

The SDT-VAS trailer is a cost-effective way to monitor traffic and enforce any temporary speed limit through traffic management. The SDT-VAS can operate continuously all year round in location without the need for an external power source. The SLOW DOWN module will activate once a vehicle passes the configurable speed limit. Options include remote camera for watching traffic flow and data logging for vehicle data.

The SDT-VAS Vehicle Activated Sign is a compact trailer designed to slow traffic entering temporary traffic management or construction sites. The SDT-VAS has an onboard battery bank with solar charging capabilities to offer autonomous operation all year round. If viewing traffic flow is important on site, the SDT-VAS can have a camera fitted which can stream live footage in real time to any smartphone via a bespoke app.

### Display –

- Size – 300mm double digit with SLOW DOWN
- Dimensions – 700mm x 500mm
- Brightness Levels – Auto-Dim LDVM® 49 Levels

### Trailer Dimensions –
