

Hand Held Radar Gun

SRA-3000

The SRA-3000 radar gun is a basic point and shoot model radar gun. Offering outstanding value for money and the “no setup configuration” makes it a very popular choice on sites within the UK. Designed for Community Speedwatch Groups, the SRA-3000 can measure a car moving up to 200ft away and the long detection range offers maximum safety for the user.

The SRA-3000 Hand Held Radar Gun is a simple point and shoot model which is a cost-effective choice and ideal for Community Speedwatch Groups and Construction Sites. The pistol style case houses the intelligent radar module which is capable at measuring a vehicle at over 200ft away. It also has an LCD display in built which displays the approaching vehicle speed and is capable of measuring speeds between 3-199mph. The low speed option allows the user to also measure slower moving vehicles such as fork lift trucks. The SRA-3000 radar gun is powered by rechargeable AAA batteries which can offer up to 8 hours continuous operation. An inbuilt Eco Mode automatically turns off the device if not being used after 30 mins.
