

SOLAR STREET LIGHTS

Harness the power of both wind and solar to provide light wherever and whenever you need it, all year round.

These units have dual off grid recharge capabilities throughout the day, using the solar modules mounted to the unit and via wind generator both day and night.

Available for weekly hire through to long term projects.

SPECIFICATION

- Lantern height – 5-6m specification dependant
- Total height – 6-7m with turbine
- Weight – 800kg
- Light distribution – 35 x 25 m

POWER

- 150W peak solar
- 300W peak wind
- 60Ah/12V/864w/h
- 5 days backup

FEATURES & BENEFITS

- Dual off grid recharge capabilities
- Quickly installed using a forklift or lift
- Solid base
- Fully off-grid operation
- Motion detection and automatic brightness adjustment

APPLICATIONS

- School zones
- Haul routes
- Airports
- Private events
- Construction or quarry sites

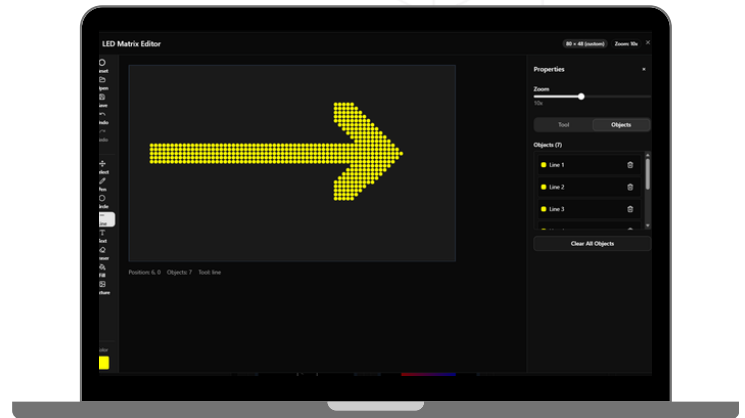

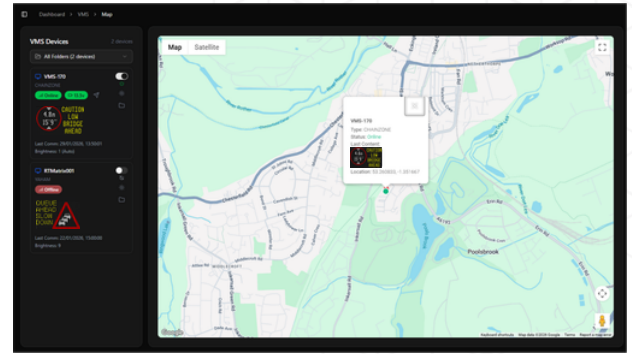

SOLUTIONS CENTRE

Solutions Centre integrates all RT Solutions and products into a unified customer interface.

Managed via an intuitive, secure portal, Solutions Centre gives the user **full visibility and control** of assets along with deep analytics - enabling ease of use and improved operational efficiency.

MAIN FEATURES

-  View and monitor assets
-  Asset health and device status
-  Map-based oversight
-  Specify message schedules
-  Extract automated reports
